Software SM2010S

Article	Software SM2010S
Article number	1000036
Application purpose	PC software for monitoring and recording silo temperature values.
Scope of delivery	PC software SM2010S on USB stick
System requirements	
Operating system	Windows 7/10
USB	min. one USB interface type I or II
Main memory	min. 4GB RAM
Hard disk	min. 5GB HD
Processor	min. 1GHz
Functions	
Display	<ul style="list-style-type: none"> - group view - with graphic display of the measured temperature values (bar chart) - Temperature course over last 30 days - continuous recording of temperature measurements - various analysis possibilities of measured temperature values - display of cell numbers as table or with silo background image
Alarms	<ul style="list-style-type: none"> - absolute alarm - difference alarm - offset alarm 1 - offset alarm 2 <p>Alarms can be set per cell or generally</p>
Data handling	<ul style="list-style-type: none"> - data export in csv and pdf format or printout (manually or cyclic printout programmable) - easy storage data management
Languages	German, English, French, Italian
Options	
Display	Controlling of filling level using the temperature difference measurement.
Alarms	Deactivation of alerting
Accessories	<ul style="list-style-type: none"> - Alarm module - Alarm light
