

Granolino II

Whole Grain - Quick Moisture Tester
integrated hectolitre scale and printer

- △ No grinding
- △ Fully automatic
- △ Easy operation
- △ Large sample volume
- △ Microprocessor controlled
- △ Integrated printer
- △ Interface

Granolino II

Whole Grain - Quick Moisture Tester

Granolino II sets new standards in moisture measurement of organic products.

Granolino II successfully continues the Granolino product line, offering a simple user guidance based on advanced technology - quick and precise.

△ Measuring principle

Granolino II has been developed according to guidelines of OIML guidelines and does reply to the latest standards of measuring technology and safety. The large-sized sample volume offers effective and extremely high measurement performance.

△ Fully automatic measurement

Granolino II allows easy and reliable water content measurement. Switch on the **Granolino II** - self test will start - choose product - fill in sample - start. Now Granolino II will work automatically. After the automatic adjustment of the hectolitrescale the inletgate opens. The sample continuously enters the measuring bin, which results in a constant bulk density. Fill in material using special cup. Therefor material weighing is not necessary. If quantity should be insufficient the **Granolino II** will show a message prior to starting.

Granolino II is measuring the volume weight by means of the internal electronic scale. At the same time product temperature and capacity measurement are performed in special measuring chamber.

The integrated high-performance computer evaluates the volume weight, temperatures and actual water content of the product. Within a few seconds results are showing the actual water content of your sample in %, temperature in °C (°F) and the volume weight in HL.

All values are printed out with relative date and time.

△ Equipment

The **Granolino II** has a powder coated and rugged housing. The unit is particularly constructed for industrial use.

△ Product memory

Standard version configuration to measure rye, wheat, barley, oats, triticale, maize, sunflowers, rape seed and durum. Additional products can be retrofitted (up to 250).

△ Scope of supply

Granolino II is supplied in special and solid transportation package.

The scope of delivery includes:

complete unit, power cable, RS232C cable, manual, sample loading cup, cleaning brush, key to access protected parameters

△ Technical data

Voltage: 90-240VAC, 50/60Hz

Net weight: 6,3kg, shipping weight: 9,5kg incl. packaging and accessories

Dimensions: 345x311x192mm,

Art. no. 4080001
